

PUREENERGY SYSTEMS

Practical AI systems for operational scale

PureEnergy Inbox Intelligence

Executive inbox triage + decision support

PROBLEM

Founder-led teams lose time when every inbox item looks equally urgent. Important messages get buried, follow-ups become manual, and the inbox becomes an operating bottleneck.

SYSTEM CONCEPT

Turns incoming email volume into a structured decision-support workspace for priority, urgency, category, response direction, follow-up state, extracted actions, and review-first draft support.

WORKFLOW

- 1 Messages enter the workspace
- 2 Priority, urgency and category are classified
- 3 Context and action items are extracted
- 4 Draft support is generated for human review
- 5 Users decide before anything is sent

PUBLIC-FACING CAPABILITIES

- Triage dashboard
- Priority / urgency
- Action extraction
- Draft support
- Review-first
- Fallback layer

WHY IT MATTERS

Fewer missed follow-ups, faster triage, clearer ownership, and less time lost to inbox pressure.

Privacy/IP: sanitized portfolio demo using demo data. Shows product thinking without exposing client information or sensitive implementation details.
