PUREENERGY SYSTEMS

Practical AI systems for operational scale

Internal Knowledge Assistant

Source-grounded internal knowledge assistant

PROBLEM

Internal answers live across SOPs, notes, playbooks, chat threads, and founder memory. Generic AI becomes risky when it guesses instead of answering from approved sources.

SYSTEM CONCEPT

Previews a private assistant that answers from approved records, showing confidence, source evidence, known gaps, and follow-up prompts.

WORKFLOW

- 1 Maintain approved internal records
- 2 Choose an operational prompt
- 3 Generate a source-grounded answer
- 4 Show confidence, evidence, and gaps
- 5 Suggest follow-up prompts
- 6 Browse source records for context

PUBLIC-FACING CAPABILITIES

- Source evidence
- Confidence
- Known gaps
- Prompt support
- Approved records
- Follow-ups

WHY IT MATTERS

Creates faster, more consistent answers while keeping source visibility and human review boundaries clear.

Privacy/IP: synthetic sample knowledge only. No private docs, drives, chat, or client records are connected.

Website: <https://www.pureenergy.systems>

SOURCE PREVIEW

Internal Knowledge Assistant

A synthetic internal assistant that answers operational questions using cited source records, confidence, gaps, and follow-up prompts.

SOURCE DISCIPLINE

The assistant answers from approved sample records and flags gaps instead of guessing.

Explore approved sample records, preview grounded answers, and reset the workspace when you want a clean start.

What should happen before a client is marked delivery-ready?

91

The client should only be marked delivery-ready once the signed agreement is in place, required document gates are cleared, kickoff ownership is confirmed, and any blockers have a named owner. If

ASK THE SYSTEM

Choose a sample prompt to preview a grounded answer from approved internal knowledge.

What should happen before a client is marked delivery-ready?

Can AI drafts be sent automatically?

How do we handle a vague AI inquiry?

What should a weekly operations report include?

ANSWER

CONFIDENCE

What should happen before a client is marked delivery-ready?

The client should only be marked delivery-ready once the signed agreement is in place, required document gates are cleared, kickoff ownership is confirmed, and any blockers have a named owner. If document or access gaps remain open, the workspace should stay in review rather than moving to delivery.

Copy answer

SOURCE EVIDENCE

Client Onboarding SOP

Do not mark delivery-ready until document gates and kickoff owner are confirmed.

Escalation Rules

Escalate client blockers after two business days without movement.

FOLLOW-UP PROMPTS

- Who owns the kickoff handoff?

- Which document gate is still incomplete?

- Has any blocker been open for more than two business days?

KNOWN GAPS

No gaps flagged for this answer.
